

A visit to the Indian Agricultural Research Institute, Pusa, New Delhi.

With a vision to update our students of classes XI and XII (medical stream) with the ongoing research in the field of Genetics, a visit to Pusa Institute of Technology was organized on 19th April 2023.

Forty students along with their teachers Mr. Nikhil Gupta, PGT Maths and Mrs. Surbhi Rai , TGT Science visited the institute.

Dr. Girijesh Singh Mahra briefed the students about the institute and careers in the field of agriculture. Thereafter, students were taken to CPCT-Centre to learn about the protected cultivation technology. The students met the Principal and Scientist, Dr. M.C Singh, who informed students about farm mechanisation and automation facility available. Students also visited the Insect Proof Net House for vegetable nursery, solar powered green house and water harvesting tank.

Students' excitement knew no bounds when they reached Nanaji Deshmukh Plant Phenomics Centre. There, Dr. Poonam explained plant phenomics, its features and goals of the centre.

Students saw supercomputers, a variety of millets and learnt about root and stem imaging. It was a great day of learning. Students enjoyed the visit.
