

ANSWER DUTY'S CALL

SEED GERMINATION ACTIVITY

As part of the experiential learning, class V students enjoyed 'Seed Germination Activity'. Students filled small pots with soil, sowed the seeds and watered it.

They were also told about the essential things needed for the growth of plants i.e., sunlight, air and water and were asked to observe their pot for a couple of days. They were happy to see the seeds sprout. The students were encouraged to save and grow more trees.
